Mr. Steven H. Gunderson
Rocky Flats Cleanup Agreement Project Coordinator
Colorado Department of Public Health and Environment
4300 Cherry Creek Drive South
Denver, Colorado 80246-1530

Dear Mr. Gunderson:

Provided for your review and approval is the enclosed Pre-demolition Survey Report for Building B-528 (DWF-084-04), dated December 13, 2004. This report characterizes the physical, chemical and radiological hazards associated with this facility, summarizes the characterization activities, defines the Data Quality Objectives developed for this Characterization, and presents the data quality assessment, verification and validation of results.

Based upon this Pre-Demolition Survey Report (PDSR) and subject to concurrence by the Colorado Department of Public Health and Environment, Building 528 remains a Rocky Flats Cleanup Agreement Type 2 Facility pursuant to the Rocky Flats Environmental Technology Site Decommissioning Program Plan (DPP; K-H, 1999) and is ready for demolition. Because surfaces within Building 528 could not be decontaminated below the Pre-Demolition Survey Plan (PDSP) radiological unrestricted release limits without compromising the structural integrity of the building, or were too difficult to decontaminate below PDSP unrestricted release limits, the entire structure will be removed and managed as low level radiological waste during demolition.

Questions may be directed to Gary Morgan, Rocky Flats Project Management, at (303) 966-6003.

TRANSMITTAL OF THE BUILDING 528 - PRE DEMOLITION SURVEY REPORT (PDSR)
DWF-084-04

Provided for your review and approval is the enclosed subject report for Building 528. This report characterizes the physical, chemical and radiological hazards associated with this facility, summarizes the characterization activities, defines the Data Quality Objectives developed for this characterization, and presents the data quality assessment, verification and validation of results.

Based upon this PDSR and subject to concurrence by the CDPHE, Building 528 remains a RFCA Type 2 Facility pursuant to the RFETS Decommissioning Program Plan (DPP; K-H, 1999) and is ready for demolition. Because surfaces within Building 528 could not be decontaminated below the PDSP radiological unrestricted release limits without compromising the structural integrity of the building, or were too difficult to decontaminate below PDSP unrestricted release limits, the entire structure will be removed and managed as low level radiological waste (LLW) during demolition.

Please notify Kaiser-Hill when you transmit this document to CDPHE. If you have any questions, do not hesitate to call me or Duane Parsons at extension 6458.
